FOREWORD

This LaTeX-template has been used by various people at department since the late 1990's, and has slowly improved over time. It is still somewhat rough at the edges, but hopefully will be helpful in reducing some of the pain involved in writing a diploma thesis.

Contributors to the template include Mika Korhonen (original author), Pekka Pietikäinen, Christian Wieser and Teemu Tokola. If you make any improvements to this template, please contact ouspg@ee.oulu.fi, and we will try to include them in further revisions.

The template was updated during the summer of 2013 by Juha Kylmänen.

1.2. Changelog

- Changed *chapter's* \newpage to \clearpage to prevent floats from wandering to the beginning of the next chapter

- Added **[hyphens]** to the url package to prevent margin overflow with long urls

- Added **multirow** package to make multirow and multicolumns possible

- Added some helpful source code comments

- Makefile for pdflatex and bibtex to automate pdf compilation

- Abbreviations are autosorted by the Makefile

- Added a bit of extra padding to the sample table

1.2.1. Sample subsection with a figure reference

Sed erat neque, cursus ac feugiat ac, sollicitudin ut odio. Maecenas vel turpis rhoncus, euismod nisl ac, tincidunt ipsum. Curabitur fermentum vel turpis ac lobortis. Cras a justo vitae diam volutpat blandit. Maecenas faucibus nibh a neque semper ullamcorper. Suspendisse in est vulputate, fermentum odio nec, pharetra augue. Fusce at consequat arcu, sed hendrerit enim. Pellentesque id suscipit nibh, id pretium erat.

Nam eget libero neque. Nullam commodo cursus turpis mollis cursus. Curabitur est tellus, pellentesque eu velit sed, ullamcorper gravida felis. Proin vel cursus risus, at scelerisque justo. Quisque rutrum justo at ultricies auctor. A sample latex figure can be seen in Figure 1. If your pictures appear grainy, you probably have too low dots per inch (DPI) value.
